

## MERRITT ACADEMY VAPING EDUCATION QUIZ

**Directions:** watch the video on the Merritt Athletics Website (under the vaping education tab). While watching this video complete this worksheet to better understand the vaping industry.

1. When and where were E-Cigarettes or Vapes invented?
2. Approximately how long have they been around versus traditional cigarettes?
3. What is supposed to be the benefit of a vape versus a traditional cigarette?
4. What chemical causes popcorn lung?
5. Explain what popcorn lung is and how it relates to vaping.
6. Explain the danger of not having a lot of information or scientific studies on e-cigarettes or vaping.
7. What can happen to the battery of a vape or e-cigarette?
8. What chemical do most vapes deliver to the brain/body?
9. How much money per year does the tobacco industry make off of vaping?
10. **SHORT ESSAY:** Explain why big tobacco companies would want e-cigarette users instead of traditional smokers? Why would keeping a user alive be beneficial to them?

When completed in full RTQ sentences please return to Mr. Girvin in the main office. Thank you!
